This communication is responsive to the Notice dated June 23, 2004, a copy of which is enclosed.

Please amend the above-specified patent application to incorporate the attached sequence listing.

This is a statement that the content of the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disk) sequence listing and, where applicable, includes no new matter, as required by 32 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d).

The instructions in the "Notice to Comply" were possibly inadequate to guide the applicant to the format that is appropriate for this sequence listing. The instructions in the Manual for Patent Examining Procedure were confusing, to say the least.

If the Examiner desires to have this information in a different format, the Applicant respectfully requests that the Examiner provides the Applicant with instructions as to the format desired.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'S. Benner', with a stylized flourish at the end.
